

Teaching & Helping Project

Can you...

Replace a sink?

Add an electrical circuit?

Build a wheelchair ramp?

Install a solar water heater?

Fix a house?

NO?! ... Then it's time to learn how!

Teaching & Helping organizes teams of volunteers and mentors to fix things on the homes of low-income Tucsonans. These one or two day projects are led by experienced professionals who want to pass on their skills to a new generation and serve those in need. Projects are both weekdays and weekends. Major tools provided.

Whether you want to:

- **Explore a great new career**
- **Help a Tucson family in need**
- **Learn to fix your own home**
- **Find a great family service project**

Teaching & Helping is for you
